Nokia C5: An Overview

The Nokia C5 was launched in 2010 as part of Nokia's feature phone lineup. It features a 2.2-inch display, a QWERTY keyboard, and runs on Nokia's Series 40 operating system. While it does not support Android apps or smartphones' full range of functionalities, it is capable of running Java-based applications, which makes it possible to install certain messaging apps like Facebook Messenger.

Facebook Messenger Compatibility

Officially, Facebook Messenger is designed for smartphones with iOS and Android operating systems, but there are Java-based versions of Messenger that can run on compatible feature phones like the Nokia C5. Users need to download the Java app (usually in JAR or JAD format) and sideload it onto their device.

Note: As of recent years, Facebook has phased out support for Messenger on many older feature phones, and installing the latest versions may not be possible. However, some users have found workarounds or older versions still functional, providing basic messaging features.
